

Integrating Treatment for Co-occurring Disorders in Mental Health Settings

Los Angeles County Department of
Mental Health

NAMI 2004 Annual Convention
September 10, 2004

Few receive treatment for Co-occurring disorders

- Less than half of 4 million adults with both a serious mental illness and a co-occurring substance use disorder received treatment for either.(SAMSHA 2002 National Survey on Drug Use and Health)
- 34 percent received mental health tx only
- 2 percent received substance use tx only
- 12 percent received both

Integrated Treatment in Los Angeles County

- Example of a local effort at solution to national problem
- Builds on existing skills; training ongoing
- Not currently linked to comprehensive outcomes system
- Monitoring of implementation ongoing
- Evaluation of program via medical records planned
